Do you need COMFORT?

Or would you rather have ROLLABILITY?

Now available on GSA Contract, Tandus' Powerbond®, a specialty floorcovering designed for the healthcare industry, is the ideal choice for any Veteran's Affairs Medical Center.

A NO SACRIFICE SOLUTION

Powerbond offers comfort underfoot and rollability, without having to sacrifice one for the other.

- Cushioned construction reduces leg and foot fatigue
- Low profile, high-density construction ensures ease of rollability

COMFORT... ROLLABILITY...

Powerbond delivers because it's engineered to.

Why Compromise?

HOW CAN TANDUS HELP YOU ENHANCE A VA HOSPITAL?

Tandus recognizes the demands you face in designing a government facility and we understand the government procurement process. Sacrifice is not an option. Comfort and rollability should be expected in your selection of floorcovering.

We've made special arrangements through **GSA** to offer you a trial price of \$2/sq. yard so you can evaluate Powerbond's performance. Don't take our word on Powerbond's benefits - see the results for yourself. Contact Customer Service to identify your representative and to find out more.

THE CHOICE IS CLEAR: THE SOLUTION IS POWERBOND.

Among the individual elements of interior design, floorcovering plays a significant role in introducing a warm, homelike feeling into any environment. Powerbond meets those needs, while providing safety and quality in a premier facility.

Working in partnership with the **Center for Healthcare Design**, a Pebble Project sponsor, Tandus is committed to improving the healthcare of our nation's veterans through continued research and "evidence-based design" to deliver high quality and cost effective facilities. For over 40 years, Tandus has served the acute and long-term care markets and we are proud to share with you the results of that experience – Powerbond.

Join us this year at IIDA's Government Design Forum during NeoCon June 13, 2008!
