\* The chemistries are required to be used as a system utilizing VonSchrader equipment.

C&A evaluates chemistry that may be used as a prespray only! C&A does not advocate the use of any solution which is added to the extractor rinse tank.

The above listed chemistry has been evaluated for the listed criteria only. No evaluation of cleaning efficacy has been performed.

All cleaning agents shall have the following characteristics:

- Contain NO optical brighteners.
- Shall NOT dry with a sticky or oily residue and must be resoil neutral. Should not contain d'limonene.
- Have a pH between 4 and 9.
- Should NOT damage nylon face yarn or remove / mute color.
- Should NOT contain a bleaching agent.
- May not alter fiber color in any way.
- Must be used as a Prespray only, followed by a clear water rinse, or accroding to label instructions for absorbent compounds or encapsulation products.
